PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 6 years 8 months of experience in building responsive web and mobile applications across logistics, ERP, and transportation domains. Adept at using React.js, Node.js, React Native, MongoDB, AWS, and the Kony Platform to develop scalable and user-centric solutions. Demonstrated success in leading teams, optimizing APIs, and delivering business-critical features under tight deadlines.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, React Native, Redux Toolkit, TailwindCSS, Shadcn UI, Node.js

Databases: PostgreSQL, MongoDB, Redis

Tools & Platforms: Postman, VoltMX Iris, Git, Jira, Confluence, XCode, Android Studio

Version Control: GitHub, Bitbucket

Development Practices: Agile, OOPs, Modular and Scalable Architecture.

Cloud: AWS

Others: Software testing, System Administration (RHCSA - RedHat)

PROFESSIONAL EXPERIENCE

Senior React Native Developer

Appstation Pvt. Ltd. | Trivandrum, Kerala | Sep 2023 – Present

- Promoted to **Senior React Native Developer** for outstanding contributions in multiple projects.
- **Qatar Rail:** Contributed to the development and maintenance of a public transportation app enabling users to manage and recharge smart cards for Qatar's metro and tram systems using the Kony Platform.
 - Integrated APIs using Foundry and collaborated with BAs for feature implementation.
 - Fixed critical production bugs, reducing crash rate by ~30% and improving production stability
- **BSporty:** Revamped an existing sports facility booking app from ground up.
 - Implemented pixel-perfect UI based on Figma designs using React Native.
 - Integrated **real-time chat functionality using firebase firestore**, significantly reduced the load time and eliminating lag issues in the chat section.
 - Ensured smooth booking workflows for various sports courts, and other critical features improving the user engagement.
 - Collaborated closely with cross-functional teams to ensure time and high-quality deliveries.

Full Stack Developer

Wingman Partners LLP | Noida, Uttar Pradesh | July 2022 – August 2023

- **Cobo:** Contributed to a large-scale network management system
 - Implemented new features and resolved production bugs across distributed **microservices architecture**.
 - Maintained a complex codebase built using **Node.js, PostgreSQL, MongoDB, redis, and messaging queues**.
 - Collaborated with QA team to validate fixes and improve test coverage.

- **Qufree (In-House product):** Built a food ordering platform tailored for corporate users to queues and receive timely lunch services.
 - Designed and implemented complex APIs using **Node.js and PostgreSQL** in a **microservices** setup.
 - Utilized **AWS S3** with signed URLs to securely implement file uploads for vendor assets.
 - Leveraged **AWS SQS** for efficiently handling parsing of large datasets during vendor menu uploads.
 - Integrated **AWS Lambda** functions for serverless processing tasks, improving scalability and reducing backend load.
 - Engineered both Admin Panel (for managing users and vendors) and mobile apps (for customers and vendors).
 - Built pixel-perfect UI from Figma designs using **React Native and React.js** and handled complete API integrations.
 - Led a small team of developers, enforced code quality through reviews, and coordinated with QA and PMs to ensure timely and high-quality delivery.

Full Stack Developer

Certo Exim | Kochi, Kerala | March 2021 – May 2022

- Engineered a social networking platform for film and entertainment industry professionals.
- Designed and implemented backend services using **Node.js and MongoDB**, including REST APIs for **authentication** (JWT, sessions, refresh tokens), **user management**, and **friend request system with mutual friends' logic**.
- Built **optimised search** APIs to improve query performance and user experience.
- Created and maintained client and admin dashboards using **React.js** and **Redux**.

Systems Engineer / Backend Developer

Fawzlabs Pvt. Ltd. | Kochi, Kerala | April 2019 – Jan 2021

- Contributed to the development of an **ERP system** tailored for educational institutions.
 - Designed and implemented robust database schemas and REST APIs to manage school modules including attendance, grades, fee collections and staff records.
 - Integrated **caching with Redis** to optimise performance and reduce redundant queries.
 - Enabled **import/export** of academic data using Excel and CSV formats and implemented **secure file uploads** mechanisms.
- Also, worked on a GPS-based logistics tracking platform.
 - Built APIs to capture and manage real-time vehicle location data via companion mobile app.
 - Implemented historical tracking racking and live map visualization features for improved fleet monitoring.
- Supported QA teams during testing cycles and ensured smooth deployment of backend services.

EDUCATION

B.Tech in Information Technology

Amal Jyothi College of Engineering, APJ Abdul Kalam Technological University, Kerala (2015 - 2019)

CERTIFICATIONS

- Certified test Engineer, Tech Masters, Trivandrum – 2021

- RedHat Certified System Administrator (RHCSA), IPSR Solutions, Kottayam – 2017

LANGUAGES

English, Malayalam, Hindi

PERSONAL PROJECTS

SideCast – An Android Screen Mirroring Desktop App

A real-time screen mirroring desktop app for android devices built with **Electron.js**, **Node.js**, **ADB** and **scrcpy**.

- Implemented live screen capture, device detection via **USB polling** and high-performance rendering.
- Designed intuitive UI with **React.js**, **TailwindCSS**, and **shadcn ui**.

RESTly – A REST API client to test API endpoints

A desktop application like Postman for testing and debugging RESTful APIs.

- Built using **Electron.js**, **React**, **Node.js**, and **Redux Toolkit with Axios** for API execution.
- Designed interface to test endpoints, view response and recent APIs and inspect headers.

create-mexn-app – Full Stack Project Scaffold CLI

An open-source CLI tool to scaffold MERN stack projects under seconds.

- Developed using **Node.js** using **commander.js** and **degint** for template cloning.
 - Supports CommonJS, ESM and TypeScript variants.
 - Published as an [NPM package](#).
 - Implemented GitHub actions to publish automatically to NPM registry when merged to main branch.
-

TECHNICAL WRITING

- [Implementation of RBAC with Node.js](#)
- [Some useful Linux commands](#)
